- A bootcamp designed to teach the fundamentals of web-design through project-based learning and providing access to tutors

SKILLS

Web design   **Software Development**
● HTML/CSS, Tailswift CSS   ● Python
● JavaScript   ● GitHub
● React
● Node.js
● Express.js

CERTIFICATIONS

CompTIA A+   **July 2024**
Google IT Cert   **April 2024**

PROJECT EXPERIENCE

Crown Clothing Project
● An eCommerce website where the user can enjoy a full shopping experience.
● Utilized React for the frontend to build the layout as well as create different routes for different pages
● Styled all the components using SCSS and used Firebase for the backend
● Implemented Stripes payment API for the card section on the checkout page

What to Wear Project
● A website that displays different pieces of clothing depending on the temperature outside.
● Utilized React for the frontend to build all the components on the website
● APIs created in Node and Express, used MongoDB to store created users and added clothing items
● Authenticated and authorized the website with Node so that users can sign up and log in

Around the U.S Project
● A website that mimics Instagram with the ability to upload, delete and like images.
● Built components and manipulated the DOM with JavaScript
● Managed the backend with a local server, processing API requests triggered by user changes
● Styled all the components on the website using CSS

WORK EXPERIENCE

IT intern at Council of People's Organization(COPO)   **June 2024 – August 2024**
● Troubleshooted continuous rebooting and no boot issues on windows desktops/laptops
● Installed the Ethernet wiring and wall ports and set up/troubleshooted switches in the finance department.
● Setup laptops and mobile devices by adding them to the domain for employee use

Dispatcher at StatPortableXray   **December 2023 – March 2024**
● Created excel sheets to keep track of vehicle maintenance
● Optimized routes for X-ray/Ultrasound techs to maximize facility visits and boost productivity.
● Discussed X-ray/Ultrasound exams, conditions, and injuries with nurses.

Machinist at Filling Equipment Co Inc   **December 2022 – June 2023**
● Fabricated parts using CNC and conventional Mill/Lathe technologies
● Communicated blueprint revisions and last-minute changes to parts with the shop foreman
